EClips Energy Technologies, Inc and Subsidiaries

Notes to Financial Statements (unaudited)

Three Months Ended March 31, 2009 and 2008

1. Significant Accounting Policies:

The following is a summary of the significant accounting policies and practices of EClips Energy Technologies, Inc., formerly known as World Energy Solutions, Inc. (the "Company") which affects the accompanying financial statements.

Organization

The Company, formerly known as Advanced 3-D Ultrasound Services, Inc. was incorporated on September 23, 1997. Advanced 3D Ultrasound Services, Inc. merged with a private Florida corporation known as World Energy Solutions, Inc. effective August 17, 2005. Advanced 3D Ultrasound Services, Inc. remained as the surviving entity as the legal acquirer, and the Company also was the accounting acquirer, at which time the Company changed its name to World Energy Solutions, Inc. ("WESI").

On November 7, 2005, WESI merged with Professional Technical Systems, Inc. ("PTS"). WESI remained as the surviving entity as the legal acquirer, while PTS was the accounting acquirer. On February 26, 2009, The Company changed its name to EClips Energy Technologies, Inc.

On October 11, 2006, the Company acquired Pure Air Technologies, Inc. ("PATI"), a subsidiary of UTEK Corporation in a tax-free stock for stock exchange. The Company issued 100,000 shares of Series A convertible preferred stock to UTEK Corporation in exchange for 100% of the issued and outstanding shares of PATI, assignment of a world wide exclusive technology license, a sponsored research agreement and \$300,000 cash (see note 2).

On September 28, 2007, the Company acquired Hydrogen Safe Technologies, Inc. ("HSTI") in a tax free stock for stock exchange. HSTI was incorporated in the State of Florida on September 20, 2007. As consideration for the agreement, the Company issued 7,500,000 unregistered shares of common stock to UTEK Corporation in exchange for 100% of the issued and outstanding shares of HSTI, assignment of an exclusive technology license for the detection of hydrogen in vehicles, engines and / or water heaters using hydrogen and oxygen, prepaid consulting fees and \$450,000 cash. (see note 2).

World Energy Solutions, Limited was created during 2007 to serve as a platform for marketing the Company's products and developments in the UK and all European Union countries.

Operations

The Company manufactures and sells transient voltage surge suppressors and related products and commercial and residential energy-saving equipment and applications to distributors and customers throughout the United States. Sales revenue in the accompanying financial statements is entirely from the sale of transient voltage surge suppressors and is recorded on the accrual method of accounting. The Company is located in St. Petersburg, Florida.

Consolidating Entities

The consolidated financial statements include the accounts of its wholly-owned subsidiaries:

- EClips Energy Technologies, Inc.
- Pure Air Technologies, Inc. ("PATI")
- Hydrogen Safe Technologies, Inc. ("HSTI")
- H-Hybrid Technologies, Inc. ("HHTI")
- Advanced Alternative Energy, Inc. ("AAEI")

Significant inter-company balances and transactions have been eliminated in consolidation.

World Energy Solutions, Limited does not have activity and has not been capitalized, and therefore, it is not consolidated in these statements.

Basis of Presentation

In the opinion of management, all adjustments consisting of normal recurring adjustments necessary for a fair statement of (a) the result of operations for the three month period ended March 31, 2009 and 2008; (b) the financial position at March 31, 2009, and (c) cash flows for the three month period ended March 31, 2009 and 2008.

The unaudited financial statement and notes are presented as permitted by Form 10-Q. Accordingly, certain information and note disclosures normally included in the financial statements prepared in accordance with accounting principals generally accepted in the United States of America have been omitted. The accompanying unaudited financial statements should be read in conjunction with the financial statements for the years ended December 31, 2008 and 2007 and notes thereto in the Company's annual report

on Form 10-K for the year ended December 31, 2008, filed with the Securities and Exchange Commission. Operating results for the three months ended March 31, 2009 and 2008 are not necessarily indicative of the results that may be expected for the entire year.

Use of Estimates

The Company prepares its financial statements in conformity with generally accepted accounting principles in the United States of America. These principles require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Management believes that these estimates are reasonable and have been discussed with the Board of Directors; however, actual results could differ from those estimates.

Industry Segment

In accordance with SFAS 131 (as amended), "Disclosures about Segments of an Enterprise and Related Information (as amended)" a company is required to disclose selected financial information and other related information about its operating segments.

Operating segments are components of an enterprise that engage in separately identifiable business activities from the Company's main operations and for which separate financial information is maintained.

The Company considers its research and development to be a segment, as the research is for product lines separable from the Company's main line of business.

Fair Value of Financial Instruments

The Company's balance sheets include the following financial instruments: cash, accounts receivable, inventory, accounts payable and accrued expenses. The carrying amounts of current assets and current liabilities approximate their fair value because of the relatively short period of time between the origination of these instruments and their expected realization.

Cash

The majority of cash is maintained with a major financial institution in the United States. Deposits with this bank may exceed the amount of insurance provided on such deposits. Generally, these deposits may be redeemed on demand and, therefore, bear minimal risk. The Company considers all highly liquid investments purchased with an original maturity of six months or less to be cash equivalents.

Accounts Receivable

Accounts receivable consist of amounts due for the delivery of finished good sales to customers. Revenue is recognized when shipments are made to customers. The Company recognizes a sale when the product has been shipped and risk of loss has passed to the customer. An allowance for doubtful accounts is considered to be established for any amounts that may not be recoverable, which is based on an analysis of the Company's customer credit worthiness, and current economic trends. Based on management's review of accounts receivable, no allowance for doubtful accounts was considered necessary. Receivables are determined to be past due, based on payment terms of original invoices. The Company does not typically charge interest on past due receivables.

Inventory

Inventory is stated at the lower of average cost or market, using the first-in, first-out method, and includes costs of materials, labor and manufacturing overhead. Inventory is comprised of raw materials, work-in-progress and finished goods.

Property and Equipment and Intangible Assets

Equipment is stated at cost. Depreciation is computed by the straight-line method over estimated useful lives (three to seven years for equipment, thirty-nine for leasehold improvements). Capital leases are included as a component of property and equipment and amortization of assets under capital leases is included in depreciation expense. The carrying amount of all long-lived assets is evaluated periodically to determine if adjustment to the depreciation and amortization period or the unamortized balance is warranted. Based upon its most recent analysis, the Company believes that no impairment of equipment existed at December 31, 2008.

The Company has recorded intangible license for \$988,660 related to acquisitions of patent rights and certain other intellectual property, secured from an unrelated company. The Company valued these licenses based on the value of the stock issued, as the Company believes that this is the more reliable measurement. The intellectual property consists primarily of patents and patent applications, which the Company has estimated has a useful life of ten to seventeen years.

The Company has capitalized website development costs per guidance of EITF 00-2, accounting for web site development costs. The costs are being amortized over the estimated life of the website of three years.

In accordance with Statement of Financial Accounting Standards (SFAS) No. 144, "Accounting for Impairment or Disposal of Long-Lived Assets," long-lived assets such as property, equipment and identifiable intangibles are reviewed for impairment whenever facts and circumstances indicate that the carrying value may not be recoverable. When required impairment losses on assets to be held and used are recognized based on the fair value of the asset. The fair value is determined based on estimates of

future cash flows, market value of similar assets, if available, or independent appraisals, if required. If the carrying amount of the long-lived asset is not recoverable from its undiscounted cash flows, an impairment loss is recognized for the difference between the carrying amount and fair value of the asset. When fair values are not available, the Company estimates fair value using the expected future cash flows discounted at a rate commensurate with the risk associated with the recovery of the assets. The Company did not recognize any impairment losses for any periods presented.

Income taxes

The Company accounts for income taxes under SFAS No. 109, "Accounting for Income Taxes," which requires use of the liability method. SFAS No. 109 provides that deferred tax assets and liabilities are recorded based on the differences between the tax bases of assets and liabilities and their carrying amounts for financial reporting purpose, referred to as temporary differences. Deferred tax assets and liabilities at the end of each period are determined using the currently enacted tax rates applied to taxable income in the periods in which the deferred tax assets and liabilities are expected to be settled or realized.

Valuation allowances are established when necessary to reduce deferred tax assets to the amount expected to be realized. Income tax expense is the tax payable or refundable for the period plus or minus the change during the period in deferred tax assets and liabilities.

Warranty Costs

The Company provides product warranties for specific product lines and accrues for estimated future warranty costs in the period in which revenue is recognized. The warranty reserve as of March 31, 2009 and December 31, 2008 was \$5,227.

Freight Costs

The Company includes freight-in costs in cost of goods sold. Total freight-in included in cost of goods sold for the years ended March 31, 2009 and 2008 was \$1,731 and \$1,783, respectively.

Advertising Expense

The Company follows the policy of charging advertising and promotions to expense as incurred. Advertising expense was \$1,944 and \$30,749 for the three months ended March 31, 2009 and 2008, respectively.

Research and Development

In accordance with SFAS No. 2, "Accounting for Research and Development Costs", the Company expenses research and development costs when incurred. Indirect costs related to research and developments are allocated based on percentage usage to the research and development. Capitalized research and development assets with alternative future uses are amortized to research and development expense over the estimated useful life of the asset.

As of the years ended March 31, 2009, the research and development segment had property and equipment with a total cost of approximately \$210,000 and approximately \$40,000 of related accumulated depreciation. These assets are amortized to research and development expense over their estimated useful lives, ranging from five to seven years.

Earnings (Loss) per Common Share

Loss per share is based on the weighted average number of common shares outstanding during each period in accordance with Statement of Financial Accounting Standards No. 128, Earnings Per Share.

	2009	2008
Net income (loss) per share basic and diluted:		
Net income (loss)	\$ (304,542)	\$ (539,849)
Weighted average shares	99,016,165	45,613,099
Net income (loss) per share	\$ (0.00)	\$ (0.01)

There were no dilutive common stock equivalents as of December 31, 2008 and 2007.

Share Based Payments

In December 2004, the Financial Accounting Standards Board (FASB) issued Statement of Accounting Standards (SFAS) No. 123 (Revised 2004), "Share-Based Payment" (SFAS 123R). SFAS 123R requires all share-based payments to employees, including grants of employee stock options to be recognized as compensation expense in the financial statements based on their fair values. That expense is recognized over the period during which an employee is required to provide services in exchange for the award, known as the requisite service period (usually the vesting period). The Company had no common stock options or common stock equivalents granted or outstanding for all periods presented

The Company, at times, issues restricted stock to consultants for various services. For these transactions the Company follows the guidance in EITF 96-18 "Accounting for Equity Instruments that are Issued to Other than Employees for Acquiring or in Conjunction with Selling Goods or Services". Cost for these transactions are measured at the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measurable. The value of the common

stock is measured at the earlier of (i) the date at which a firm commitment for performance by the counterparty to earn the equity instruments is reached or (ii) the date at which the counterparty's performance is complete. The Company recognized consulting expenses and a corresponding increase to additional paid-in-capital related to stock issued for services.

Stock compensation, when issued, were issued to consultants for past services provided, accordingly, all shares issued are fully vested, and there is no unrecognized compensation associated with these transactions. Stock based compensation was \$0 and \$8,000, for the three months ended March 31, 2009 and 2008, respectively.

2. Mergers and Acquisitions:

Pure Air Technologies, Inc. (PATI)

On October 11, 2006, the Company acquired 100% of the issued and outstanding stock of Pure Air Technologies, Inc. (PATI), a subsidiary of UTEK Corporation in a tax free stock for stock exchange. PATI was incorporated in the State of Florida on August 7, 2006 and had no prior accounting activity and no liabilities as of the date of the acquisition. The Company issued 100,000 shares of the Company Series A convertible preferred stock in exchange for \$300,000 cash, \$231,709 of prepaid sponsored research and license agreements, including a world wide exclusive license in the field of air purification, for a technology designed to help eliminate organic and biological airborne organisms. The Preferred Stock issued in the exchange is restricted and may only be resold pursuant to the requirements of the Securities Act of 1933.

The intellectual rights related to the purchase of PATI were valued at \$3,456,631 at the time of the acquisition. While the Company anticipates further development of the related technology, as of December 31, 2006, the technology had not yet been tested on the market nor had there been any related sales. Estimation of future sales could not be determined as the technology is not yet ready to be introduced into the market place and knowledge of when or if the Company can fully develop the technology is not known. In addition, the consideration of other similar technology entering the market prior to the Company can not be determined. Based on the above factors, the Company concluded that the valuation of the intangible could not be fully supported and therefore as of December 31, 2006, the Company deemed the intellectual rights impaired and wrote them off during 2006.

Hydrogen Safe Technologies, Inc. (HSTI)

On September 28, 2007, the Company acquired Hydrogen Safe Technologies, Inc. (HSTI) in a tax-free stock for stock exchange. As consideration for the agreement, the Company issued 7,500,000 unregistered shares of common stock to UTEK Corporation in exchange for 100% of the issued and outstanding shares of HSTI, assignment of an exclusive technology license for the detection of hydrogen in vehicles, engines and / or water heaters using hydrogen and oxygen, prepaid consulting fees, related to a nine month consulting agreement, and \$450,000 cash.

The HSTI license agreement has 3% royalties due on net sales of the licensed product which can be netted against required minimum annual royalties. For the year 2008-2009, \$5,000 minimum royalties are due and payable January 31, 2010; for years 2009-2010, the minimum royalty is \$10,000; for years 2010-2011 the minimum royalty is \$15,000; after 2011 the minimum annual royalties are \$30,000. All minimum royalties are due and payable on January 31, of the following calendar year. The agreement can be terminated on thirty days notice if the company fails to pay any due and payable royalties and the license would revert back to the licensor and all royalties and payments would cease.

The purchase price of \$3,825,000 was based on the stock closing price on the date of acquisition. The resulting intangible asset of \$3,332,650 was analyzed and although the Company anticipates further development of the related technology, as of December 31, 2007, the technology had not yet been tested on the market nor had there been any related sales. Estimation of future sales could not be determined as the technology is not ready to be introduced into the market place and knowledge of when or if the Company can fully develop the technology is not known. In addition, consideration of other similar technology entering the market prior to the Company can not be determined. Based on the above factors, the Company concluded that the capitalized value of the intangible could not be fully supported and therefore as of December 31, 2007, the Company deemed the intangible asset to be impaired and expensed it.

Advanced Alternative Energy, Inc. (AAEI)

On June 10, 2008, WESI acquired Advanced Alternative Energy, Inc. (AAEI) in a tax free stock for stock exchange. AAEI was incorporated in the State of Florida on May 20, 2008. As consideration for the agreement, the Company issued 100,000 shares of Series B Convertible Preferred Stock to UTEK Corporation in exchange for 100% of the issued and outstanding shares of AAEI, assignment of an exclusive technology license for the production and preparation of mechanically and electrochemically stable electrodes and transition metal oxide catalysts; prepaid consulting fees and \$200,000 cash.

The preferred shares may be converted by the holder at any time into common stock prior to the sixty month anniversary of the execution of the agreement into the value of \$3,500,000 of common shares of WESI, based on the average of the five day closing price prior to the conversion. At any time after six months and before the sixty month anniversary of the execution of the agreement, WESI will have the right, at its sole discretion, to repurchase at an agreed upon percentage value, any non-converted

shares of the Series B Convertible Preferred Stock. The shares may be repurchased within twelve months at 105%; within thirteen and twenty-four months at 110%; within twenty-five and thirty-six months at 115%; and at anytime after thirty-six months at 120% of the value of the original pro rata purchase price. The convertible preferred shares have no voting rights.

Royalties will become due on a quarterly basis based upon the net sales of any of the licensed products sold from the technology license. Royalties are to be paid within ninety days and are based on 3% of the net sales on the licensed products. The royalty obligations will terminate on a country by country basis upon the expiration of the last to expire licensed patent covering the licensed product in each such country. Twelve months after the first anniversary of the execution of the license agreement, minimum annual royalties become due. The minimum royalty due for the second anniversary year of the executed agreement is \$5,000; for the third anniversary is \$10,000; for the fourth anniversary is \$15,000 and for the fifth anniversary thereafter until the end of the license term is \$30,000. AA EI will reimburse any patent costs incurred to maintain or control the patents related to the technology and licensed products.

The prepaid consulting expenses relate to technical consulting services to be provided related to the license. The consulting agreement was entered into by UTEK on the behalf of AA EI and per the agreement any additional consulting expenses will be the direct responsibility of UTEK.

The purchase price of \$3,500,000 was based on the agreed face value of the Series B Convertible Preferred Stock as of the date of acquisition. The resulting intangible asset of \$3,264,000 was analyzed and although the Company anticipates further development of the related technology, as of June 30, 2008, the technology had not yet been tested on the market nor had there been any related sales. Estimation of future sales could not be determined as the technology is not ready to be introduced into the market place and knowledge of when or if the Company can fully develop the technology is not known. In addition, consideration of other similar technology entering the market prior to the Company can not be determined. Based on the above factors, the Company concluded that the valuation of the intangible could not be supported and therefore as of June 30, 2008, the Company deemed the intangible asset to be totally impaired and wrote it off.

3. Inventory:

Inventory consists of the following at:

	March 31, 2009	December 31, 2008
Raw materials	\$ 86,419	\$ 62,614
Finished goods	28,867	26,152
Purchased finished goods	34,640	23,940
	<u>149,926</u>	<u>112,706</u>
Less allowance for obsolescence	(13,056)	(13,056)
	<u>\$ 136,870</u>	<u>\$ 99,650</u>

4. Other Current Assets:

During the year ended December 31, 2006, the Company loaned \$30,000 to a consultant with an original maturity date of November 15, 2007. The loan which accrues interest at 6% per annum was extended. As of March 31, 2009 accrued interest was \$4,287 and is included in other current assets.

5. Property and Equipment:

Property and equipment consist of the following:

	March 31, 2008	December 31, 2007
Autos and Trucks	\$ 43,544	\$ 96,287
Furniture, Fixtures and Equipment	381,567	169,923
Leasehold Improvements	19,423	19,423
	<u>444,534</u>	<u>285,633</u>
Accumulated Depreciation	(162,733)	(120,437)
	<u>\$ 281,801</u>	<u>\$ 165,196</u>

Office equipment at December 31, 2008 includes equipment acquired under a capital lease with a capitalized value of \$16,073, which was fully depreciated. Depreciation expense was \$12,195 and \$12,716 for the three months ended March 31, 2009 and 2008, respectively.

6. Intangible Assets:

Other assets include license agreements in the total amount of \$818,000 and website development costs of \$45,650. The Company has world wide exclusive licenses in the field of air purification, for technology designed to help eliminate organic and biological airborne organisms; and for the exclusive rights for surface acoustic wave hydrogen sensor technology, which includes the rights for use, sub-licensing and selling related licensed products. Licenses are being amortized over a life of 17 years.

	<u>2009</u>	<u>2008</u>	
Intangible - HHTI license	\$ 818,000	818,000	10 year
Website Development	45,650	45,650	3 year
Licenses and patents	125,010	-	17 year
	<u>988,660</u>	<u>863,650</u>	
Accumulated Amortization	(76,540)	(38,660)	
	<u>\$ 912,120</u>	<u>\$ 824,990</u>	

Future amortization of intangible assets:

2010	98,120
2011	92,596
2012	89,154
2013	89,154
2014	89,154
thereafter	453,942
	<u>\$ 912,120</u>

Amortization expense was \$37,880 and \$7,442 for the three months ended March 31, 2009 and 2008, respectively.

7. Lease Commitments:

The Company maintains two facilities: its main office which houses the corporate and manufacturing facilities and a second unit used for research and development within the same industrial complex and has two separate leases related to these facilities. The main office lease has a term expiring on September 30, 2009. During the term of the lease the Company is required to maintain comprehensive public liability insurance, including property damage for the benefit of the Company and the lessor.

The research and development lease expires on October 14, 2009 and the payment of its rent is guaranteed by the Company's President. The lease requires the Company to maintain comprehensive general liability insurance with minimum limits of \$1,000,000 combined single limit coverage of bodily injury, property damage or combination thereof. The lessor shall be listed as an additional insured on this policy.

As of December 31, 2008, the minimum rental payments due under these operating leases are as follows:

December 31,	<u>Amount</u>
2009	\$ 23,802
2010	-
2011	-
2012	-
2013	-
Thereafter	-
	<u>\$ 23,802</u>

Total rent expense on these leases was \$16,661 and \$16,845 for the three months ended March 31, 2009 and 2008, respectively.

8. Related Party Transactions:

The Company leases its main office space referred to in footnote 7 from a related party. The total rent expense related to this lease was approximately \$8,346 for the three months ended March 31, 2009 and 2008. The Company also entered into a

consulting agreement with this related party and pays a monthly payment of \$3,000 for marketing and financial consulting services.

Amounts due to or due from related parties are advances or payments in advance in the normal course of business and are immaterial and temporary in nature. These advances or amounts to be reimbursed are non-interest bearing.

The amounts and terms of the above transactions may not necessarily be indicative of the amounts and terms that would have been incurred had comparable transactions been entered into with independent third parties.

9. Concentrations of Credit Risk:

The Company sells its products to customers on an open credit basis. The Company's trade accounts receivable are due from such customers and are generally uncollateralized. During the three month period ended March 31, 2009 and 2008, two customers accounted for 35% and 24% of Company sales.

10. Income Taxes:

The Company has not recognized an income tax benefit for its operating losses generated based on uncertainties concerning its ability to generate taxable income in future periods. The tax benefit for the periods presented is offset by a valuation allowance established against deferred tax assets arising from operating losses and other temporary differences, the realization of which could not be considered more likely than not. In future periods, tax benefits and related deferred tax assets will be recognized when management considers realization of such amounts to be more likely than not.

The provision for federal and state income taxes for the three months ended March 31, 2009 is as follows:

	2009	2008
Current	\$ -	\$ -
Deferred	-	-
Total Provision for Income Taxes	\$ -	\$ -

Deferred income taxes reflect the net effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

	March 31, 2009	December 31, 2008
Deferred tax assets:		
Net operating loss carry forwards	\$ 6,905,600	\$ 6,792,000
Other	7,000	7,000
Total deferred tax assets	\$ 6,912,600	\$ 6,799,000
Deferred tax liabilities:		
Book basis of property and equipment in excess of tax basis	\$ 19,000	\$ 15,000
Total deferred tax liabilities	\$ 19,000	\$ 15,000
Net deferred tax asset before valuation allowance	\$ 6,893,600	\$ 6,784,000
Valuation allowance	(6,893,600)	(6,784,000)
Net deferred tax asset	\$ -	\$ -

The Company has recorded a 100% valuation allowance against the net deferred tax asset at March 31, 2009 and December 31, 2008 due to the uncertainty of its ultimate realization. As time passes, management will be able to better assess the amount of tax benefit it will realize from using the net deferred tax asset resulting from the loss carry forwards. The valuation allowance, for the three months ended March 31, 2009 increased by \$109,600.

At December 31, 2008, the Company has available unused federal net operating losses of approximately \$18,100,000 that may be used against future taxable income and if not utilized, will expire by the end of 2026.

Income taxes for the three month periods ended March 31, 2009 differ from the amounts computed by applying the effective income tax rate of 34.0% to income taxes as a result of the following:

Expected provision (benefit)	\$ (113,600)
Effect of:	
State income taxes net of federal benefits	(10,100)
Non-deductible (income) expense	-
Other, net	-
Change in valuation allowances	123,700
	<u>\$ -</u>

11. Stock Transactions:

The Company entered into employment agreements with the CEO and the former President and Chairman of the Board on January 31, 2006. In addition to a weekly base salary, the compensation included the issuance of 600,000 shares of the Company's common stock in connection with an offering of securities conducted by the Company pursuant to United States Securities and Exchange Commission Form S-8.

The valuation of these shares was based on the stock closing price of \$1.45 on January 31, 2006, resulting in a valuation of \$870,000 for each of the above two employees. The total expense of \$1,740,000 for the two agreements was recognized during the first quarter of 2006. In December, 2006, the Board of Directors approved the cancellation of these and other shares that had been issued to certain consultants due to the performance expectations of the Company related to these agreements not being met.

The employment agreements did not specify any specific performance conditions that had to be met for the employees to receive the common shares. Since one of the employees is still actively employed by these agreements and all other terms of the agreement remains in place, the cancellation of these shares was accounted for by the guidance of FAS 123R, "Share Based Payment (as amended)". The cancellation was not accompanied by a replacement award and management has no anticipation to replace these awards of stock, so it was accounted for as a repurchase for no consideration and the shares were immediately cancelled. The par value of the shares cancelled was recorded as treasury stock as of December 31, 2006.

On October 11, 2006, The Company acquired 100% of the issued and outstanding stock of Pure Air Technologies, Inc. ("PATI"), a subsidiary of UTEK Corporation in a tax free stock for stock exchange. The Company issued 100,000 shares of the Company Series A convertible preferred stock in exchange for \$300,000 cash, \$293,369 of prepaid sponsored research and license agreements, including a world wide exclusive license in the field of air purification, for a technology designed to help eliminate organic and biological airborne organisms. At any time after one year, at the election of UTEK, the convertible preferred stock could convert into \$4,050,000 of restricted common stock of the Company, based on the previous ten day average closing bid price on the date of conversion. With a minimum of at least ten cents (\$0.10) per share; thereby limiting the maximum number of restricted common shares to be received upon conversion to 40,500,000.

During the twelve month period in which UTEK was holding the preferred stock, the Company accrued interest at an annual rate of 5%, compounded quarterly, which was payable in cash or common shares of the Company. On October 11, 2007, UTEK Corporation converted all of the 100,000 Series A convertible preferred shares that were issued with the acquisition of Pure Air Technologies, Inc. In addition, accrued dividends in the amount of \$202,500 were converted. A total of 8,437,500 Common Shares of the Company were issued for the conversions.

In February 2007, the company issued 650,000 stock options to a director of the company for consulting services valued at approximately \$182,836.

On April 16, 2007, the Company entered into an agreement to secure \$5,000,000 financing through a private placement of the Company's common stock. The agreement is effective for 180 days or until such financing has been achieved. As compensation for the agreement, the Company paid a \$15,000 sign on fee. A consultancy fee of 10% of the aggregate gross proceeds of the common stock purchased through introductions from the investor firm, plus 3% in non-accountable expenses, payable in cash shall be due at the time of the investor purchases.

Thirteen percent of the aggregate number of securities purchased by investors introduced by the investor firm shall be payable in warrants that are exercisable into the Company's common stock. The expiration date shall not be less than three years, unless warrants are issued as part of the offering, in which case the warrants granted to the investor firm shall have the same expiration date of the investor warrants. The warrant exercise price shall be the same price of the Company's common stock issued at the time of the offering, or if warrants are issued as part of the offering, then the exercise price shall be the same as those offered. As of March 31, 2009, no financing had been obtained through this agreement.

During May, 2007, the Company entered into an agreement for consulting services in connection with obtaining capital or debt financing in an aggregate amount of no less than \$3,000,000. In exchange for these services, the Company paid the consultant a non refundable fee of \$6,500 and also will pay certain costs and expenses incurred by the consultant related to his services to the Company. No individual cost or expense of \$100 or greater shall be incurred by the consultant without prior approval of the Company. As of December 31, 2008, no financing had been obtained from this agreement.

The Company entered into a Regulation S distribution agreement on January 14, 2009 which replaced the Regulation S distribution agreement entered into on November 29, 2008. The total of up to 20,000,000 shares of restricted common stock to be offered remained the same. The shares sold will be offered on the lower of the closing bid price for the Company's stock as quoted on the NASDAQ Bulletin Board on the date prior to the trade date or the closing price of said shares minus an original offering discount of 15%. The agreement terminates on December 31, 2009 unless extended in writing by both parties. The agreement may also be terminated at any time with 21 days written notice by the Company.

In February, 2008, the Company entered into a Regulation S distribution agreement to offer up to a total of 20,000,000 shares of stock exclusively to non-nationals and non-residents of the United States of America. The agreement can be terminated at any time by either party without penalty by providing one month's written notice.

On March 3, 2008, the Company entered into a Regulation S distribution agreement to offer up to a total of 20,000,000 shares of restricted common stock. The shares sold will be offered on the lower of the closing bid price for the Company stock as quoted on the NASDAQ Bulletin Board on the date prior to the trade date or the closing price of said shares minus an original offering discount of 15%. The agreement has been extended and terminates on December 31, 2009 unless extended in writing by both parties. The agreement may also be terminated at any time with 21 days written notice by the Company.

On February 13, 2009 the Company sold 1,500,000 shares of the restricted Preferred Stock (with 500 votes per share) to Benjamin C. Croxton, the Company's Chief Executive Officer. The Company exchanged the shares for an assignment of accrued vacation pay and back salary in the amount of \$8,256.50 due to Mr. Croxton. The issuance of the restricted Preferred Stock and the consideration received by the Company were approved by the Board of Directors at a meeting on February 10, 2009. The shares of restricted Preferred Stock were issued in a private transaction pursuant to the exemption from registration provided by Section 4(2) of the Securities Act of 1933. The shares of restricted Preferred Stock have 750,000,000 shareholder votes which when combined with Mr. Croxton's common stock holdings equates to 87.9% of the total combined shareholder votes of 858,138,831 for both the issued and outstanding common stock and Preferred Stock.

12. Commitment and Contingencies:

Going concern:

As reflected in the Statement of Operations, the Company has had recurring losses and negative cash flows from operations. These factors are an indication that that the Company may not be able to continue as a going concern. To continue as a going concern, the Company will need to raise additional capital, borrow funds, or generate more revenues from current product sales and new product sales associated with the business plan implementation. If current cash flow is not sufficient to cover planned operations in 2009, management believes it can raise additional capital from private placements, borrow funds from its officers, and delay certain expenditures to continue as a going concern during the next year.

Legal matters:

From time to time the Company may be a party to litigation matters involving claims against the Company. In the first quarter of 2009, a suit has been brought against the company by a former employee regarding a cancelled employment agreement. The Company believes it has a strong defense in all significant matters of the case. However, this matter may result in an adverse judgment or award, or the Company may choose to settle the matter, due to the associated costs and risk of continuing. The Company believes it is not possible to determine whether a loss will be incurred, or to estimate any potential losses, that would be material to the financial statements. Based on current information, management believes that the resolution of matters currently pending will not have a material adverse impact on the financial condition or cash flows of the Company.

13. Recent Accounting Pronouncements:

The Financial Accounting Standards Board and other entities issued new or modifications to, or interpretations of, existing accounting guidance during 2008. The Company has carefully considered the new pronouncements that altered generally accepted accounting principles and does not believe that any new or modified principles will have a material impact on the Company's reported financial position or operations in the near term.

In December 2007, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 141(revised 2007), Business Combinations, which replaces SFAS No. 141. The statement retains the purchase method of accounting for acquisitions, but requires a number of changes, including changes in the way assets and liabilities are

recognized in the purchase accounting. It also changes the recognition of assets acquired and liabilities assumed arising from contingencies, requires the capitalization of in-process research and development at fair value, and requires the expensing of acquisition-related costs as incurred. SFAS No. 141(R) is effective for the Company beginning January 1, 2009 and will apply prospectively to business combinations completed on or after that date.

In September 2006, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards (“SFAS”) No. 157, “Fair Value Measurements.” SFAS No. 157 clarifies the principle that fair value should be based on the assumptions market participants would use when pricing an asset or liability and establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. Under the standard, fair value measurements would be separately disclosed by level within the fair hierarchy. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years, with early adoption permitted. The adoption of SFAS No. 157 did not have a material impact on the Company's financial condition or results of its operations.

In February 2007, the Financial Accounting Standards Board issued Statement of Financial Accounting Standards (“SFAS”) No. 159, “The Fair Value Option for Financial Assets and Financial Liabilities.” SFAS No. 159 permits entities to choose to measure many financial instruments and certain other items at fair value. The objective is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. SFAS No. 159 is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those fiscal years, with early adoption permitted. The adoption of SFAS No. 159 did not have a material impact on the Company's financial condition or results of its operations.

In December 2007, the FASB issued SFAS No. 160; Noncontrolling Interest in Consolidated Financial Statements, and amendment of ARB 51, which changes the accounting and reporting for minority interest. Minority interest will be recharacterized as noncontrolling interest and will be reported as component of equity separate from the parent's equity, and purchases or sales of equity interests that do not result in change in control will be accounted for as equity transactions. In addition, net income attributable to the noncontrolling interest will be included in consolidated net income on the date of the income statement and, upon a loss of control, the interest sold, as well as any interest retained, will be recorded at fair value with any gain or loss recognized in earnings. SFAS No. 160 is effective for the Company beginning January 1, 2009 and will apply prospectively, except for the presentation and disclosure requirements, which will apply retrospectively. The Company is not part of a consolidating group and currently is not affected by this pronouncement.

In March 2008, the Financial Accounting Standards Board issued SFAS No. 161, Disclosures about Derivative Instruments and Hedging Activities. SFAS No. 161 requires additional disclosures related to the use of derivative instruments, the accounting for derivatives and the financial statement impact of derivatives. SFAS No. 161 is

effective for fiscal years beginning after November 15, 2008. The adoption of SFAS No. 161 will not impact the Company's financial statements.

In May 2008, the FASB issued SFAS No. 162, “The Hierarchy of Generally Accepted Accounting Principles” (“SFAS 162”). SFAS 162 identifies the sources of accounting principles and the framework for selecting the principles used in the preparation of financial statements of nongovernmental entities that are presented in conformity with generally accepted accounting principles (the GAAP hierarchy). SFAS 162 will become effective 60 days following the SEC's approval of the Public Company Accounting Oversight Board amendments to AU Section 411, “The Meaning of Present Fairly in Conformity With Generally Accepted Accounting Principles.” The Company does not currently expect the adoption of SFAS 162 to have a material effect on our results of operations and financial condition.

In May 2008, the FASB issued FSP Accounting Principles Board (“APB”) 14-1 “Accounting for Convertible Debt instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement)” (“FSP APB 14-1”). FSP APB 14-1 requires the issuer of certain convertible debt instruments that may be settled in cash (or other assets) on conversion to separately account for the liability (debt) and equity (conversion option) components of the instrument in a manner that reflects the issuer's non-convertible debt borrowing rate. FSP APB 14-1 is effective for fiscal years beginning after December 15, 2008 on a retroactive basis. As we do not have convertible debt at this time, we currently believe the adoption of FSP APB 14-1 will have no effect on our results of operations and financial condition.

In April 2008, the FASB issued FSP FAS 142-3, Determination of the Useful Life of Intangible Assets (“FSP FAS 142-3”). FSP FAS 142-3 amends the factors that should be considered in developing renewal or extension assumptions used to determine the useful life of a recognized intangible asset under SFAS No. 142, Goodwill and Other Intangible Assets (“SFAS 142”). The intent of FSP FAS 142-3 is to improve the consistency between the useful life of a recognized intangible asset under SFAS 142 and the period of expected cash flows used to measure the fair value of the asset under SFAS 141(R) and other applicable accounting literature. FSP FAS 142-3 is effective for financial statements issued for fiscal years beginning after December 15, 2008. The Company does not anticipate that the adoption of FSP FAS 142-3 will have an impact on its results of operations or financial condition.

In June 2008, the FASB issued FSP EITF 03-6-1, Determining Whether Instruments Granted in Share-Based Payment Transactions Are Participating Securities ("FSP EITF 03-6-1"), which addresses whether instruments granted in share-based payment transactions are participating securities prior to vesting and, therefore, need to be included in the computation of earnings per share under the two-class method described in SFAS No. 128, Earnings per Share. FSP EITF 03-6-1 is effective retrospectively for financial statements issued for fiscal years and interim periods beginning after December 15, 2008. The adoption of FSP EITF 03-6-1 will not materially impact the Company's financial condition and results of operations.

14. Subsequent Events:

During the first quarter of 2009, the Company has been named in a legal action by a former employee. See note 12, Legal Matters for a discussion of this event.

As discussed in note 2, Mergers and Acquisitions, convertible preferred shares were issued to a corporation, UTEK Corporation, for the transfer of technology assets. On May 7, 2009 we were notified by the holder of the preferred stock that they are exercising their option to convert the preferred shares into common shares, valued at \$3,500,000, share price based on the average of the five day closing price prior to conversion. Based on the conversion, the Company will be issuing 55,118,111 shares of its common stock.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operation or Plan of Operation.

Cautionary Notice Regarding Forward Looking Statements

The information contained in Item 2 contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. Actual results may materially differ from those projected in the forward-looking statements as a result of certain risks and uncertainties set forth in this report. Although management believes that the assumptions made and expectations reflected in the forward-looking statements are reasonable, there is no assurance that the underlying assumptions will, in fact, prove to be correct or that actual results will not be different from expectations expressed in this report.

We desire to take advantage of the “safe harbor” provisions of the Private Securities Litigation Reform Act of 1995. This filing contains a number of forward-looking statements which reflect management’s current views and expectations with respect to our business, strategies, products, future results and events, and financial performance. All statements made in this filing other than statements of historical fact, including statements addressing operating performance, events, or developments which management expects or anticipates will or may occur in the future, including statements related to distributor channels, volume growth, revenues, profitability, new products, adequacy of funds from operations, statements expressing general optimism about future operating results, and non-historical information, are forward looking statements. In particular, the words “believe,” “expect,” “intend,” “anticipate,” “estimate,” “may,” variations of such words, and similar expressions identify forward-looking statements, but are not the exclusive means of identifying such statements, and their absence does not mean that the statement is not forward-looking. These forward-looking statements are subject to certain risks and uncertainties, including those discussed below. Our actual results, performance or achievements could differ materially from historical results as well as those expressed in, anticipated, or implied by these forward-looking statements. We do not undertake any obligation to revise these forward-looking statements to reflect any future events or circumstances.

Readers should not place undue reliance on these forward-looking statements, which are based on management’s current expectations and projections about future events, are not guarantees of future performance, are subject to risks, uncertainties and assumptions (including those described below), and apply only as of the date of this filing. Our actual results, performance or achievements could differ materially from the results expressed in, or implied by, these forward-looking statements. Factors which could cause or contribute to such differences include, but are not limited to, the risks to be discussed in our Annual Report on form 10-KSB/A and in the press releases and other communications to shareholders issued by us from time to time which attempt to advise interested parties of the risks and factors which may affect our business. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

The following are factors that could cause actual results or events to differ materially from those anticipated, and include but are not limited to: general economic, financial and business conditions; changes in and compliance with governmental regulations; changes in tax laws; and the costs and effects of legal proceedings. For example, a few of the uncertainties that could affect the accuracy of forward-looking statements include:

- An abrupt economic change resulting in an unexpected downturn in demand;
- Governmental restrictions or excessive taxes on our products;
- Over-abundance of companies supplying energy conserving products and services;
- Economic resources to support the retail promotion of new products and services;
- Expansion plans, access to potential clients, and advances in technology; and
- Lack of working capital that could hinder the promotion and distribution of products and services to a broader based business and retail population.
-

Introduction

EClips Energy Technologies, Inc. (referred to as the “Company”, “ECET”, or in the first person notations of “we,” “us,” and “our”) began operations in 1984 under the corporate name of Professional Technical Systems, Inc. (PTS). PTS merged with WESI in November 2005 (the “November 2005 Merger”) with WESI being the legal acquirer but PTS being the accounting acquirer and subsequently changed business name to EClips Energy Technology, Inc.

The Company manufactures and sells transient voltage surge suppressors and related products and commercial and residential energy-saving equipment and applications to distributors and customers throughout the United States. Although this activity is expected to continue, the Company plans to implement a new business model to market a multi-product package to commercial, industrial and residential facilities in order to lower their overall cost of electric, gas and water of these facilities. The Company plans to market its package both by direct sales as well as a Shared Revenue Program (SRP) where the Company pays for the entire installation cost of the product package in return for payments of a percentage of the savings realized by the facilities using

the product package. This new business model is expected to increase revenues and profits for the Company. The Company also intends to aggressively develop and market its H²O technology and its pure air technology.

Selected Historical Data	2009	2008
Revenue	86,600	85,794
Total Operating Expenses	337,241	564,024
Income (Loss) From Operations	(312,126)	(538,775)
Other Income (Expense)	(673)	(1,074)
Benefit (Provision For Income Taxes)	-	-
Net Loss	(312,799)	(539,849)
Net Income (Loss) Per Share Of Common Stock	(0.00)	(0.01)
Total Assets	1,442,166	1,347,418
Total Liabilities	781,927	537,291
Total Stockholders' Equity	660,239	810,127

Results of Operations

For the three months ended March 31, 2009 and 2008

Revenues

Total product sales were \$86,600 and \$85,794 for the three months ended March 31, 2009 and 2008, respectively. Gross profit on sales was approximately 29% in both comparative three month periods.

Operating Expenses

Our operating expenses for the three months ended March 31, 2009 decreased to \$337,241 from \$564,024 for the three months ended March 31, 2008. The decrease of approximately \$175,000 in the three month period ended March 31, 2009 is mostly related to a decrease in professional and consulting expenses.

We expect significant increases in future consulting, salary and research and development expenses as a result of the implementation of our new business model.

Net Loss

Net losses incurred in all periods presented have been primarily due to the operating costs. These expenses resulted in the net losses in the amount of \$312,799 and \$538,775 for the three months end March 31, 2009 and 2008 respectively. The decrease in the year over year net loss was due primarily from operating expenses, as described above. At this time, normal costs of public filing will continue, which requires significant expenditures for professional expense, and it is not known when significant revenues will occur to off-set these expenses.

Liquidity and Capital Resources

The cash used in operating activities for the three months ended March 31, 2009 was less than the cash used in the same period for 2008 by approximately \$176,000. Gross profit from sales remained consistent at 29% for the periods presented. General and administrative expenses and operating expenses decreased approximately \$227,600. Decreases in professional and consulting expenses during the three months ended March 31, 2009, compared to the same period in 2008, contributed to the decrease in expenses between the years.

We do not believe our working capital is sufficient to implement the full spectrum of our planned, new energy-saving business model. Operations in 2008 and most of 2007 have been funded in large part through the sale of common stock and such funding will need to continue in order to allow us to implement our new business model. The Company has been successful in acquiring certain services through consulting agreements that are funded in large part through the issuance of common stock as noted above.

However, the Company currently is offering its stock through a private placement memorandum. The Company plans to raise additional capital through the sale of common stock. The proceeds from the sale will be used to fund research and development consulting and professional fees, new job installs, other expenses and for working capital.

Subsequent Events

As discussed in note 2, Mergers and Acquisitions, convertible preferred shares were issued to a corporation, UTEK Corporation, for the transfer of technology assets. On May 7, 2009 we were notified by the holder of the preferred stock that they are exercising their option to convert the preferred shares into common shares, valued at \$3,500,000, share price based on the average of the five day closing price prior to conversion. Based on the conversion, the Company will be issuing 55,118,111 shares of its common stock.

Recent Accounting Pronouncements

The Financial Accounting Standards Board and other standard-setting bodies issued new or modifications to, or interpretations of, existing accounting standards during the year. The Company has carefully considered the new pronouncements that alter previous generally accepted accounting principles and does not believe that any new or modified principles will have a material impact on the corporation's reported financial position or operations in the near term. These recently issued pronouncements have been addressed in the footnotes to the financial statements.

Critical Accounting Policies

The results of operations are based on preparation of financial statements in conformity with accounting principles generally accepted in the United States. The preparation of financial statements requires management to select accounting policies for critical accounting areas as well as estimates and assumptions that affect the amounts reported in the financial statements. The Company's accounting policies are more fully described in Note 1 to Notes of Financial Statements found in the Company's annual financial statements filed with Form 10-K. We have identified the following accounting policy and related judgment as critical to understanding the results of our operations.

The Company prepares its financial statements in conformity with generally accepted accounting principles in the United States of America. These principals require management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Management believes that these estimates are reasonable and have been discussed with the Board of Directors; however, actual results could differ from those estimates.

The Company issues restricted stock to consultants for various services. For these transactions the Company follows the guidance in EITF 96-18 "Accounting for Equity Instruments that are Issued to Other than Employees for Acquiring or in Conjunction with Selling Goods or Services". Cost for these transactions are measured at the fair value of the consideration received or the fair value of the equity instruments issued, whichever is more reliably measurable. The value of the common stock is measured at the earlier of (i) the date at which a firm commitment for performance by the counterparty to earn the equity instruments is reached or (ii) the date at which the counterparty's performance is complete.

In accordance with Statement of Financial Accounting Standards (SFAS) No. 144, "Accounting for Impairment or Disposal of Long-Lived Assets," long-lived assets such as property, equipment and identifiable intangibles are reviewed for impairment whenever facts and circumstances indicate that the carrying value may not be recoverable. When required impairment losses on assets to be held and used are recognized based on the fair value of the asset. The fair value is determined based on estimates of future cash flows, market value of similar assets, if available, or independent appraisals, if required. If the carrying amount of the long-lived asset is not recoverable from its undiscounted cash flows, an impairment loss is recognized for the difference between the carrying amount and fair value of the asset. When fair values are not available, the Company estimates fair value using the expected future cash flows discounted at a rate commensurate with the risk associated with the recovery of the assets. We did not recognize any impairment losses for any periods presented.

SFAS No. 109, "Accounting for Income Taxes" requires that deferred tax assets be evaluated for future realization and reduced by a valuation allowance to the extent we believe a portion will not be realized. We consider many factors when assessing the likelihood of future realization of our deferred tax assets including our recent cumulative earnings experience, expectations of future taxable income, the carry-forward periods available to us for tax reporting purposes and other relevant factors. At December 31, 2008, our net deferred tax assets are comprised principally of net operating loss carry forwards (NOL's). Classification of deferred tax assets between current and long-term categories is based on the expected timing of realization, and the valuation allowance is allocated on a prorated basis.

We have reflected a valuation allowance of 100%, which resulted in an income tax benefit of zero. The range of possible judgments relating to the valuation of our deferred tax asset is very wide. If we had concluded that the weight of available evidence supported a decision that substantially all of our deferred tax assets may be realized, we would have a substantial income tax benefit in our statement of operations. Significant judgment is required in making this assessment, and it is very difficult to predict when, if ever, our assessment may conclude our deferred tax assets is

realizable.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk.

We are a Smaller Reporting Company as defined by Rule 12b-2 of the Securities Exchange Act of 1934 and are not required to provide the information under this item.

Item 4. Controls and Procedures.

Item 4T. Controls and Procedures.

Evaluation of disclosure controls and procedures

The management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting. The Company's internal control over financial reporting is a process designed under the supervision of the Company's Chief Executive Officer and Chief Financial Officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the Company's financial statements for external purposes in accordance with U.S. generally accepted accounting principles.

Under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, we conducted an evaluation of the effectiveness of the design and operation of our disclosure controls and procedures, as such term is defined under Rules 13a-15(e) and 15d-15(e) promulgated under the Securities Exchange Act of 1934, as amended, as of March 31, 2009. Based on this evaluation, our Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures as of the end of such period are not effective due to the Company's limited internal resources and lack of ability to have multiple levels of transaction review. Through the use of external consultants and the review process, management believes that the financial statements and other information presented herewith are materially correct.

The Company's disclosure controls and procedures are designed to provide reasonable assurance of achieving their objectives. However, the Company's management, including its Chief Executive Officer and Chief Financial Officer, does not expect that its disclosure controls and procedures will prevent all error and all fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. Further, the design of a control system must reflect the fact that there are resource constraints, and the benefit of controls must be considered relative to their costs. Because of the inherent limitations in all control systems, no evaluation of controls can provide absolute assurance that all control issues and instances of fraud, if any, within the Company have been detected.

(b) Changes in Internal Controls.

The Company's management, including the Chief Executive Officer, Director, and Chief Financial Officer (Principal Accounting and Financial Officer), confirm that there was no change in the Company's internal control over financial reporting during the quarter ended March 31, 2009 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings.

From time to time the Company may be a party to litigation matters involving claims against the Company. In the first quarter of 2009, a suit has been brought against the company by a former employee regarding a terminated employment agreement. The Company believes it has a strong defense in all significant matters of the case. However, this matter may result in an adverse judgment or award, or the Company may choose to settle the matter, due to the associated costs and risk of continuing. The Company believes it is not possible to determine whether a loss will be incurred, or to estimate any potential losses, that would be material to the financial statements. Based on current information, management believes that the resolution of matters currently pending will not have a material adverse impact on the financial condition or cash flows of the Company.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

During the three month period ending March 31, 2009, the Company issued unregistered shares of its common stock as set forth in the table below.

Date	Name	Total Dollar Amount	Price per Share	Total Number of Shares
2/23/09	Robert Bloch	\$10,500	\$0.015	700,000
3/05/09	Jan Haukos	\$5,000	\$0.015	333,333
3/05/09	Wayne Huepenbeck	\$5,000	\$0.015	333,333
3/27/09	Flavis Lazenby	\$10,000	\$0.01	10,000,000

All sales of shares of common stock identified in the table above were made pursuant to Section 4(2) of the 1933 Act. The proceeds of the sale of these securities are to provide operating capital and development costs.

On February 13, 2009, the Company sold 1,500,000 shares of its restricted Series "D" Preferred Stock (the "Preferred Stock") to our Chief Executive Officer, Benjamin C. Croxton. The aggregate offering price for the shares was \$8,256.50. The issuance of the restricted Preferred Stock and the consideration received by the Company were approved by the Board of Directors at a meeting on February 10, 2009. The shares of restricted Preferred Stock were issued in a private transaction pursuant to the exemption from registration provided by Section 4(2) of the Securities Act of 1933.

Item 3. Defaults Upon Senior Securities.

None

Item 4. Submission of Matters to a Vote of Security Holders.

No matter was submitted during the quarter ending March 31, 2009, covered by this report to a vote of our shareholders, through the solicitation of proxies or otherwise.

Item 5. Other Information.

None

BENJAMIN C. CROXTON,
Chief Executive Officer
Chief Financial Officer, Director

**CERTIFICATION PURSUANT TO
SECTION 302 OF THE SARBANES-OXLEY ACT OF 2002**

**Certification of
Chief Executive Officer and
Chief Financial Officer**

I, Benjamin C. Croxton, certify that:

1. I have reviewed this quarterly report on Form 10-Q of EClips Energy Technologies, Inc.;

2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;

3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;

4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:

(a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;

(b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;

(c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and

(d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially

affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and

5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):

(a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and

(b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.
